

Weather App Project Guide

1. File Naming Conventions

Main JavaScript file: weatherapp.js

CSS file: weatherapp.css

2. How to Make Changes

a) To change the React code:

- Open weatherapp.js and make the required updates.

b) To update the CSS:

- Open weatherapp.css and update the styles.

Example: Change background color or font size.

c) To update text:

- Locate the text in weatherapp.js and modify it.

Example: Change 'Enter City' to 'Enter your city'.

3. How to Run the Project

1. Open the terminal and navigate to the project folder:

```
cd your-project-folder-name
```

2. Install dependencies:

```
npm install
```

3. Start the development server:

Weather App Project Guide

npm start

4. Open <http://localhost:3000> in your browser to test the app.

4. How to ZIP and Share the Project

1. Right-click the project folder.
2. Select 'Send to > Compressed (zipped) folder'.
3. Share the ZIP file with your team or company.

Provide the instructions to run the project as mentioned above.
